## SEVEN OAKS SCHOOL DIVISION

### HEARING PROTECTION AGREEMENT

To comply with Seven Oaks School Division Policy GABGF, where exposure to noise levels cannot be reduced to below 80 decibels by altering workplace conditions, employees must be provided hearing protection upon request.

Employees who are exposed to harmful noise in excess of 85 decibels over a workday must be **required** to use hearing protection and educated as to the hazards of noise exposure and the means to protect against hearing loss. The success of these protective measures must be assessed by means of an annual hearing test or audiogram.

It has been determined that the following employee is to be provided with hearing protection:

**Name:** \_\_\_\_\_

**Position:** \_\_\_\_\_

**School/Location:** \_\_\_\_\_

In accordance with Manitoba's Workplace Safety and Health Regulation and Seven Oaks School Division Policy, I agree to wear the hearing protection equipment provided by the Division.

I am aware that failure to wear hearing protection may result in a stop work order or compliance order issued by a Manitoba Workplace Safety and Health Officer.
